

## One Tool... Many Applications

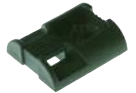

The *CableMaster Pulsa* Gas System is suitable for installing small to medium size PVC, HDPE, High Pressure Plastic and Copper pipes to concrete, hollow blocks, steel and timber.

Where pipes need to be installed quickly for permanent or temporary use, the *CableMaster* pipe installation system allows pipes to be fixed around existing services, directly to the wall, floor or ceiling. All clips can be used with the *CableMaster* extension pole to fix from the ground.

### Suggested *Pulsa* accessories:

#### ClipElec™ with Cable Tie pg 14

- Universal design uses cable ties up to 9mm wide.
- Halogen free and UV resistant.
- Energy absorber for perfect embedment.
- Clips directly to the *CableMaster* pin guide.
- Hands-Free installation.
- Impact and fire resistant polypropylene.

#### Combination Clip with Strap pg 22

- One piece clip with releasable strap
- UV resistant. Copolymer. Halogen free.
- Wide adjustable strap for maximum pipe support.
- Elevated mounting position for improved pipe protection.
- Side mount clip to pin guide.
- Can be clipped together for multiple installation.
- High temperature resistance.
- Optional plug and screw installation.

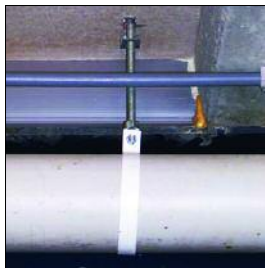

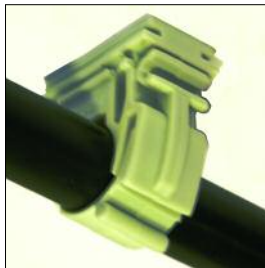

#### ECAV Clip pg 20

- 2 part clip with internal bracing.
- One clip suits multiple pipe diameters.
- Clamps and supports pipe above work surface.
- Allows for movement due to flexing and water pressure.
- Protects pipe from abrasion or damage.
- Impact and temperature resistant.

#### Threaded Rod Hanger (TRH) pg 24

- For PVC, HDPE and Plastic Pipes (up to 100mm diameter).
- Thick steel with reinforcing ribs for extra strength.
- Dual threads (M10/8), less parts, more flexibility.
- Slide on channel for pin guide. Lateral insertion for fast, safe installation.
- Rod height adjustment for correct pipe gradient.

Ramset recommends application tests on-site before commencing use.
