

Fast Fixing, Lower Installed Costs

CableMaster™ Pulsa™ Gas Tool

SPEED AND EFFICIENCY

- Fastens pipes up to 20 times faster than other traditional systems.
- Fixes in seconds. Less labour cost. Less time on site.
- Fully automatic operation.
- No special training required.
- Fix to Concrete, Concrete Block, Steel, Bondek® and Timber Materials.
- Up to 50% less work load to use overhead.
- Batteries are recharged "FREE" on site.
- Better balanced for continuous use. The centre of gravity is in line with the trigger.

LATEST GAS TECHNOLOGY

- Provides continuous positive fixing with less gas wastage.
 - Electronic control system measures the air temperature and automatically adjusts the electro valve for optimal air/gas mixture.
 - Patented linear combustion engine with steel piston rings and precision machined combustion chamber.
- Minimal effort to fix overhead and from the ground.
 - Low pin guide actuation force (5kg).
 - *Pulsa* extension pole. No ladders, less scaffolding.
- Low noise. Suits internal and external use.

POWER AND MOBILITY

- Automatic power adjustment provides precise control of pin depth.
- Powerful motor delivers high impact force when required.
- No power leads ensures full job site mobility.

SAFE AND SECURE

- Compact and balanced design.
 - Reduces operator fatigue.
 - Easy access to confined spaces.
- Pin "lock out" feature.
- Single hand operation.
- Full battery disconnection in standby position.
